

Finance Credit Follow-Up Agent

Sample Output Report

Prepared by: Param Saxena

Email: param5saxena@gmail.com

Phone: 9810363542

This document presents the sample output of a deployed Streamlit-based Finance Credit Follow-Up Agent. It highlights the dashboard, invoice register, email generation workflow, audit log, and escalation queue used to manage overdue invoice follow-ups.

Submission Date: 11 May 2026

1. Project Overview

The Finance Credit Follow-Up Agent automates overdue payment follow-up workflows for a finance team. It reads invoice records, calculates the overdue stage, generates professional reminder emails, logs all actions to SQLite, and provides a Streamlit dashboard for human review.

- Reads invoice data from invoices.csv and calculates days overdue.
- Assigns follow-up stages from Stage 1 to Stage 4 based on invoice ageing.
- Generates follow-up email previews in dry-run mode before sending.
- Maintains audit logs for generated reminders and escalation decisions.
- Flags invoices overdue by more than 30 days for manual finance/legal review.

2. Applicant Details

Field	Details
Name	Param Saxena
Email	param5saxena@gmail.com
Phone	9810363542
Project	Finance Credit Follow-Up Agent

3. Technical Summary

Component	Implementation
Frontend	Streamlit dashboard
Core Logic	Custom Python agent pipeline
AI Provider	Google Gemini Flash model
Data Source	CSV invoice register
Database	SQLite audit database
Safety Mode	Dry-run enabled for review before sending
Deployment	Streamlit Community Cloud

4. Sample Output Summary

Metric	Sample Output
Total overdue invoices	7
Active follow-up invoices	6
Escalated invoices	1
Total outstanding amount	INR 915,500
Follow-up stages covered	Stages 1, 2, 3, and 4
Output mode	Dry-run review mode

5. Sample Generated Email

Subject: Quick Reminder: Invoice INV-2024-001

Dear Mr. Kapoor,

I hope you are doing well. This is a friendly reminder that invoice INV-2024-001 for INR 45,000.00, due on 2026-05-07, is now 4 day(s) overdue.

Whenever convenient, please complete the payment or let us know if it has already been processed. You can make the payment here: <https://pay.example.com/INV-2024-001>

Regards, Finance Team, Accounts Receivable

6. Application Screenshots

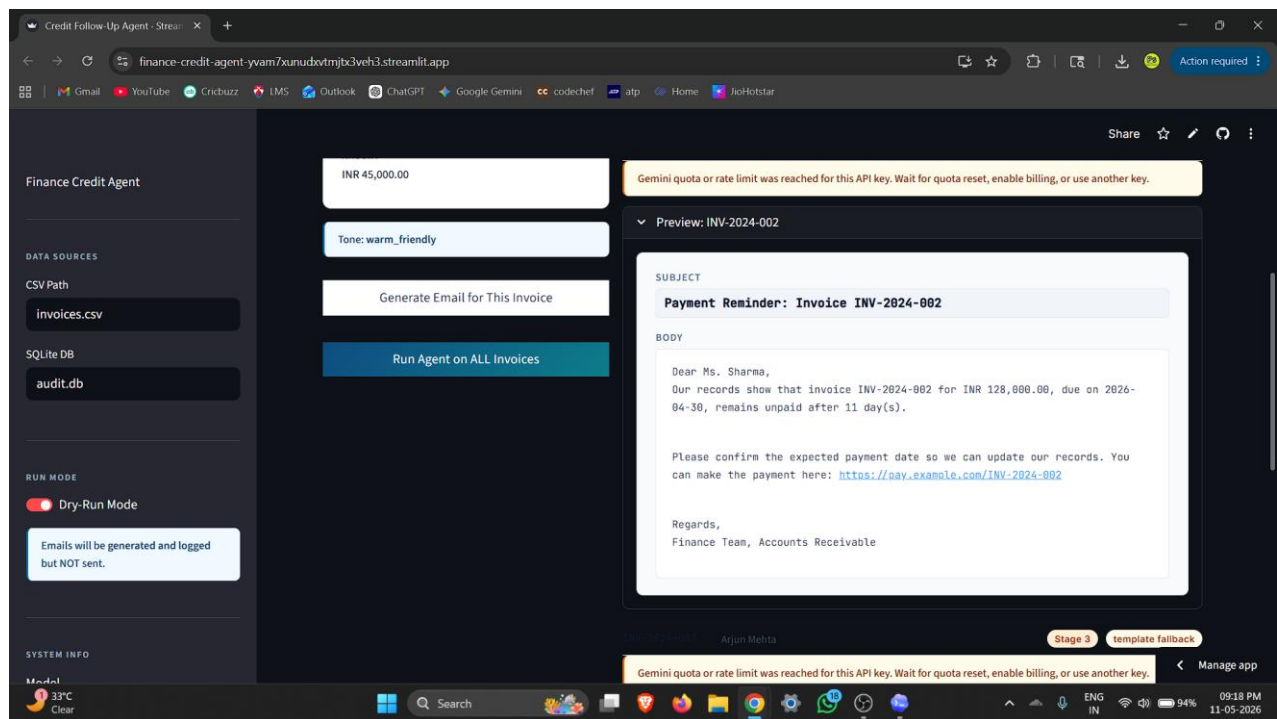

Figure 6: Audit log view recording generated follow-up emails and processing metadata.

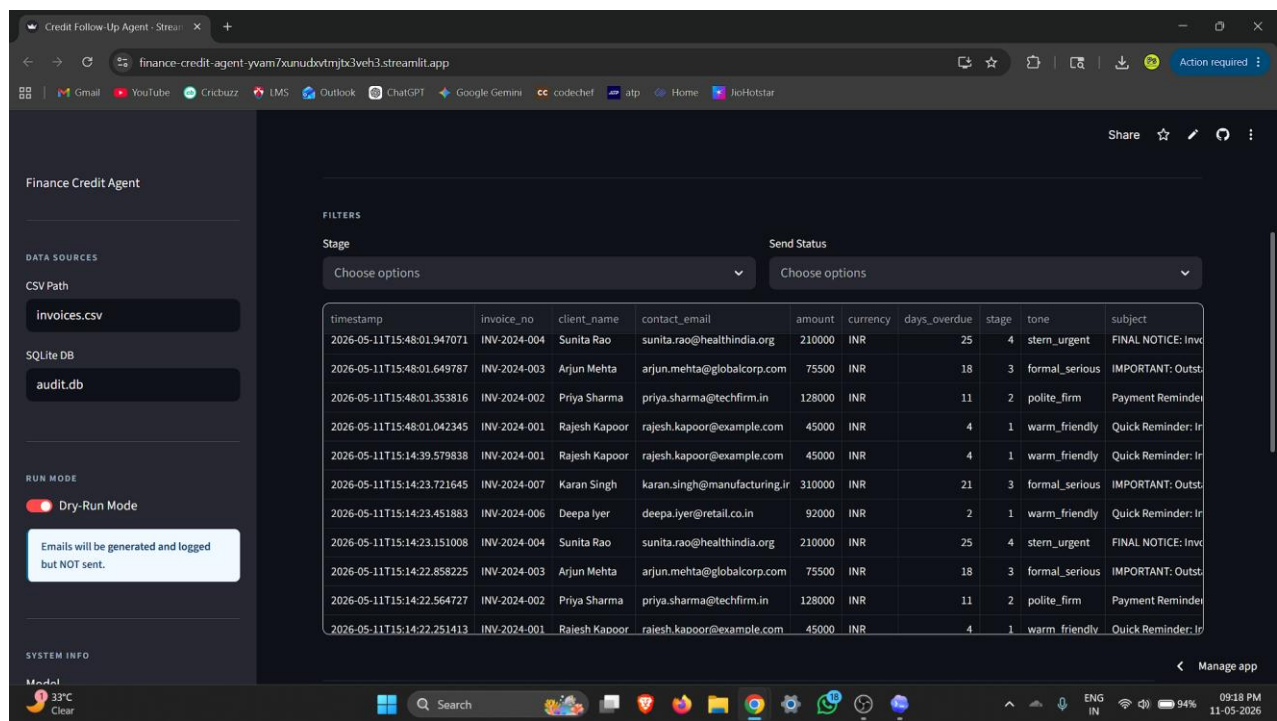

Figure 7: Escalation queue for invoices overdue by more than 30 days.

7. Conclusion

The sample output confirms that the Finance Credit Follow-Up Agent can present overdue invoice metrics, generate email previews, maintain audit records, and separate escalated cases for manual review. The dashboard is suitable for demonstrating an end-to-end finance follow-up workflow in a controlled dry-run environment.
